

ATT 594 carboxylic acid

<http://cn.lumiprobe.com/p/atto-594-carboxylic-acid>

ATT 594 is a red-fluorescent rhodamine dye with high fluorescence quantum yield, strong thermal and photostability, and excellent water solubility. The dye is well-suited for high-resolution microscopy and single-molecule detection applications.

ATT 594 carboxylic acid is a non-reactive form of ATT 594 dye that can be used as a reference standard in experiments involving ATT 594 dye conjugates. Besides, the carboxylic group can react with hydrazines, hydroxylamines, and amines using carbodiimides such as EDAC.
