## **BDP® TMR-X-NHS ester**

http://cn.lumiprobe.com/p/bdp-tmr-x-nhs-ester

BDP TMR is a borondipyrromethene dye for the TAMRA channel. The dye has much brighter fluorescence than TAMRA. Because of the rather long lifetime of the excited state, this fluorophore is a good choice for fluorescence anisotropy measurements.

This derivative is an amine-reactive NHS ester with an aminohexanoic acid (C6) linker between the dye and the functional group. The dye is suitable for labeling proteins, peptides, and other molecules with amino groups.
