

BDP® TR NHS ester

<http://cn.lumiprobe.com/p/bdp-tr-nhs-ester>

This product will be discontinued soon in favor of [BDP TR X NHS ester](#). We may still have some material in stock (please see availability above).

BDP TR is a bright and photostable borondipyrromethene dye, which is especially suitable for microscopy applications. The dye has a long excited state lifetime, and is therefore useful for fluorescence polarization assays. Its large two-photon cross section makes this dye useful for two-photon spectroscopy.

This NHS ester is an amine-reactive form of the dye.
