

Hexaethylene glycol phosphoramidite

<http://cn.lumiprobe.com/p/hexaethyleneglycol-phosphoramidite-spacer-c18>

Spacer phosphoramidite 18 (hexaethylene glycol phosphoramidite) is an amidite reagent for oligonucleotide synthesis. It provides a long hydrophilic linker that can be used for the synthesis of Scorpion-type qPCR probes, for spacing biotin from oligo strand, and for other applications requiring spatial separation of modifier and oligo.
