

Phosphate CPG 1000 solid support

<http://cn.lumiprobe.com/p/phosphate-cpg-1000>

Phosphate modified oligos are used for gene synthesis by ligation, and other applications. Phosphate CPG 1000 is a modifier solid support for the synthesis of oligonucleotides bearing phosphate at 3 prime end.

CPG 1000 is suitable for the synthesis of long oligos up to 120 mer, the use of long oligos allows for a more efficient gene assembly. The CPG is compatible with standard synthesis and deblocking procedures, it ensures smooth cleavage and complete phosphorylation.
