

DusQ® 21 carboxylic acid

http://cn.lumiprobe.com/p/qsy-21-quencher-carboxylic-acid

DusQ® 21 is a fluorescence quencher. DusQ 21 possesses broad absorption in far red and NIR range, and can quench fluorescence of dyes that emit in this region. This is a carboxylic acid derivative.

DusQ 21 has intense absorption maximum at 656 nm, making it useful as an acceptor in fluorescence resonance energy transfer (FRET) applications. It is a common quencher for <u>Cyanine5</u>, <u>Cyanine5.5</u>, <u>AF 647</u>, or other spectrally similar fluorescent dyes.
